METAL-TEK® Aerosols & Compounds | Aerosols

Smoke Detector Tester Spray

Metal-Tek® Smoke Detector Tester Spray is specially formulated for the simulation of smoke activation.

The formulation of aerosol particles simulates smoke during fire conditions.

Applications:

For secure testing of optical or photoelectrical smoke detectors without the need of additional testing instruments.

Product Features:

- Fast activation
- Portable
- Fast drying
- Easy testing procedure

Availability:

IMPA	Product Description	Unit
331074	Smoke Detector Tester Spray	Can

Technical Specifications:

Content 400ml

Instructions For Use:

- 1) Shake the spray can thoroughly before use.
- 2) Block away any strong air current or ventilation equipment that may affect the spray.
- 3) Spray for 3 to 5 seconds, repeat if necessary. The alarm status will be activated within 5 to 10 seconds. If the detector fails to respond within a minute, the detector might be faulty.

Safety Handling Consideration:

Keep container tightly sealed. Store in a cool and dry place. Avoid skin and eye contact. Ensure adequate ventilation. No smoking. Keep away from ignition and naked flames. Keep out of reach of children.

See product **Material Safety Data Sheet** for complete information.
